**Microsoft Gold Certified Partner, Elliott Davis Technology Solutions, LLC (EDTS),
Achieves Unified Communications Solutions Competency**

AUGUSTA Ga., Aug. 12, 2008 – Elliott Davis Technology Solutions, LLC (EDTS), a full-service technology consulting firm, has received the Unified Communications Solutions Competency from Microsoft, with specializations in Messaging and IM/Presence.

EDTS, a Microsoft Gold Certified Partner, attained this competency after proving its expertise in delivering solutions based on Microsoft Unified Communications technologies.

Microsoft Unified Communications technologies help streamline communications between people and organizations, regardless of medium, platform, device, or location. The Unified Communications Solutions Competency will allow EDTS to demonstrate its expertise in planning, deploying, and managing solutions for email and calendaring, as well as presence and instant messaging (IM), using Microsoft Unified Communications technologies such as Microsoft Exchange Server and Microsoft Office Communications Server.

“Communication is constantly changing; therefore, it is crucial to stay abreast of current trends and technologies,” said Charles Johnson, EDTS’ managing shareholder. “This competency will allow us to showcase our proficiency in messaging and IM/presence, differentiating ourselves in the market and adding value to our clients,” added Johnson.

EDTS was founded in 1999 with only two employees and has continually expanded its services and increased its staff. The combined knowledge of EDTS’ workforce represents more than 80 years of experience in the IT industry.

About EDTS:

EDTS is a full-service technology-consulting firm offering a wide range of comprehensive business technology services. Its engineers and technicians concentrate on providing end-to-end networking and security solutions for clients in the Southeast with primary focus areas of practice in network integration, support, security and maintenance.
